Prescribed Forms for the Graduate School of Chemical Sciences and Engineering (Enclosed)

① Admission application, resume, examination admission card, and examinee photo card
② Return envelope for examination admission card (requires ¥384 in postage)
③ Contact information stickers used to mail the notification of exam results and other information
④ Examination fee payment information (with prescribed payment slip)
⑤ English Score Reporting Form
⑥ Submission form for payment certificate
Overview of the Graduate School of Chemical Sciences and Engineering and the Division of Chemical Sciences and Engineering

Hokkaido University reorganized the Department of Chemistry in its Graduate School of Science along with three chemistry-related divisions in its Graduate School of Engineering (the divisions of Chemical Process Engineering, Biotechnology and Macromolecular Chemistry, and Materials Chemistry) to form the Graduate School of Chemical Sciences and Engineering and the Division of Chemical Sciences and Engineering in April 2010 (admission quotas in master’s course: 129; admission quotas in doctoral course: 38).

In the Graduate School of Chemical Sciences and Engineering, chemistry and biochemistry professors of science and engineering who are affiliated with the Faculty of Science, Faculty of Engineering, Research Institute for Electronic Science, Institute for Genetic Medicine, and the Institute for Catalysis work closely together on research and education activities. Researchers affiliated with the National Institute for Materials Science, National Institute of Advanced Industrial Science and Technology, RIKEN, and the National Cerebral and Cardiovascular Center participate as instructors in related fields. These diversely experienced instructors offer not only specialized lectures in the Molecular Chemistry and Engineering Course, Materials Chemistry and Engineering Course, and Biological Chemistry and Engineering Course, but also a rich diversity of classes, including lectures in English. As a result, they are able to provide instruction and research guidance so that students will be able to view the field of chemistry from both the perspectives of science and engineering and contribute to society in related fields.

Educational Goals

By providing a systematic education that integrates research findings in the various fields of chemistry, such as molecular chemistry, materials chemistry, and biochemistry, the Graduate School of Chemical Sciences and Engineering strives to equip students with both basic and advanced specialized knowledge in the field of chemistry; to cultivate individuals with broad-based knowledge, a strong sense of discernment, and the ability to use their knowledge in practical applications to meet the needs created by trends toward internationalization, advanced developments in science and technology, and interdisciplinary approaches; and to nurture students who have the depth of knowledge and skills necessary for conducting basic and applied research and who will therefore be well equipped to conduct innovative research going forward.

Admission Policy

The Graduate School of Chemical Sciences and Engineering accepts talented applicants who want to learn about the specialized fields of science and engineering and earn their master’s or doctoral degrees in the field of integrated chemistry as well as applicants who want to earn their doctoral degrees while continuing their employment. The graduate school also actively accepts international students. Admission periods are in April and October.

The master’s course entrance examination consists of written and oral exams in specialized subjects. The examination is administered to measure the applicant’s level of knowledge in basic and specialized subjects in his/her field of specialization, but considerations are made to ensure that a wide variety of applicants is accepted.

The doctoral course entrance examination consists of an oral assessment to evaluate the applicant’s specialized knowledge and research skills.

Also, in order to demonstrate the required knowledge and skills of English language, applicants are required to provide the score report of English proficiency exam.

In both the master’s and doctoral courses, applicants with particularly remarkable academic transcripts or especially impressive research and development experience at their companies or institutions may be exempt from taking the written exam.
I. General Admission and Working Adult Admission

1. Admission Quotas

Notes:

The number of admission quotas includes several slots for working adult and international student applicants.

Individuals expecting to remain employed at the time of admission may apply through the working adult admission process.

2. Application Qualifications

(1) Individuals who have been awarded a master’s degree or professional degree from a Japanese university (the term “professional degree” used hereinafter shall refer to the professional degree prescribed in Article 5-2 of the Degree Regulations [Ordinance of the Ministry of Education, Science and Culture No. 9 of 1953] pursuant to stipulations in Article 104, Clause 1, of the School Education Act); this includes those who are expected to be awarded such a degree by March 2020.

(2) Individuals who have been awarded or are expected to be awarded a degree equivalent to a master’s degree or professional degree from a foreign university by March 2020. (hereinafter referred to as “individuals from a foreign educational system”)

(3) Individuals who have been awarded or are expected to be awarded a degree equivalent to a master’s degree or professional degree by March 2020 by taking a correspondence course in Japan offered by a foreign school (hereinafter referred to as “individuals from a foreign educational system via correspondence course”)

(4) Individuals who have completed a graduate school coursework of a foreign university at an educational institution in Japan and have been awarded a degree equivalent to a master’s degree or professional degree. The institution needs to be positioned within the school education system of that foreign country as an educational body with a graduate school course and is required to be designated by the Japanese Minister of Education, Culture, Sports, Science, and Technology. This includes those who expect to be awarded such a degree by March 2020 (hereinafter referred to as “individuals who have completed coursework in a school designated as equivalent to a graduate school”).

(5) Individuals who have been awarded or are expected to be awarded a degree equivalent to a master’s degree by March 2020 from the United Nations University as prescribed in Article 1(2) of the Act on Special Measures Incidental of Enforcement of the Agreement between the United Nations and Japan regarding the Headquarters of the United Nations University (Act No.72 of 1976), which was established under the December 11, 1972 resolution of the General Assembly of the United Nations (hereinafter referred to as “individuals from the UN University”).

(6) Individuals who have completed their formal education by taking a correspondence course through a non-Japanese university, an educational institution which received the designation by (4), or the United Nations University, who have passed an examination or a screening equivalent to the regulations by Article 16.2 in Standards for the Establishment of Graduate Schools, and who are recognized to have an academic ability equivalent to Master’s degree holders by the Graduate School, or who will obtain it by March 2020 (hereinafter referred to as "individuals from a foreign university who have been passed a Qualifying Examination").

(a) Those who have graduated from a university; have conducted research for two years or longer at a university, research institution, etc.; and are recognized by this graduate school as possessing equivalent or greater academic capabilities as those of a person who has a master’s degree based on its research achievements, etc.

(b) Those who have completed 16 years of school education in a foreign country or 16 years of school education of a foreign country by taking a correspondence course in Japan offered by a school of that foreign country; have conducted research for two years or longer at a university, research institution, etc.; and are recognized by this graduate school as possessing equivalent or greater academic capabilities as those of a person who has a master’s degree based on its research achievements, etc.

(8) Applicants who are recognized by the graduate school as possessing the equivalent or greater academic skill as that of a person who has a master’s degree or professional degree based on an individualized admission qualification investigation and who will be 24 years of age as of March 31, 2020 (hereinafter referred to as “individuals who apply through an individualized admission qualification investigation”)

Notes:
If you have any questions regarding the Application Qualifications, contact the Administration Office of the Graduate School of Chemical Sciences and Engineering (hereafter referred to as “CSE office”).

3. Preliminary Review of Application Qualifications (Application Period, Etc.)
December 9 (Mon.) through December 12 (Thu.), 2019

We will conduct a preliminary review of application qualifications before accepting applications from individuals applying based on the following qualifications:

(6) Individuals from a foreign university who have been passed a Qualifying Examination

(7) Individuals designated by the Minister of Education, Culture, Sports, Science, and Technology

(8) Individuals who apply through an individualized admission qualification investigation

Individuals applying based on the application qualifications listed above should submit the documents indicated in section 5, “Application Documents,” with the exception of item No. 2 (submission form for the validated portion of the prescribed payment slip), during this period.

The applicant should not pay the examination fee when requesting a preliminary review of application qualifications. The examination fee is to be paid as per instructions in the notes below. (Documents can be submitted from 9:00 a.m. to 5:00 p.m., on weekdays only. If you send your documents by postal mail, they must be received by the deadline indicated.)

Notes:
The results of the preliminary review of application qualifications will be mailed out around mid-January, 2020. Those who are deemed eligible to apply should pay the examination fee as per section 7, “Examination Fee,” during the period indicated in section 4 “Application Period.” After payment is made, please submit the validated portion (portion E) of the prescribed payment slip to the university. If you do not pay the examination fee by the deadline indicated, your application will not be processed.

Applicants residing outside Japan who are allowed to submit their applications via the Internet should follow the on-screen instructions to arrange payment of the examination fee and the administrative fee (¥500).

Note that Japanese government (MEXT) scholarship students, China Scholarship Council (CSC)
supported students, Hokkaido University President’s Fellowship recipients, and Hokkaido University Special Grant Program international students (as well as those who are expecting to receive one of these scholarships) may be exempt from paying the examination fee. If there is a possibility that you will be eligible for an exemption, please contact the CSE office in advance.

4. Application Period
January 14 (Tue.) through January 20 (Mon.), 2020

Individuals applying based on the following qualifications:
(1) Individuals who have been awarded a master’s degree or professional degree from a Japanese university by March 2020
(2) Individuals from a foreign educational system
(3) Individuals from a foreign educational system via correspondence course
(4) Individuals who have completed coursework in a school designated as equivalent to a graduate school
(5) Individuals from the UN University

Individuals applying based on the application qualifications listed above should submit the documents indicated in section 5, “Application Documents,” during this period.

If you send your documents by postal mail, they must be received by the deadline indicated. (Documents can be submitted between 9:00 a.m. and 5:00 p.m. on weekdays only.)

5. Application Documents
(1) Individuals wishing to apply through the general admission process should submit following documents.

</tbody>
</table>
6. Where to Apply
Administration Office, Graduate School of Chemical Sciences and Engineering, Hokkaido University (CSE Office)
Kita 13, Nishi 8, Kita-ku, Sapporo, 060-8628 Japan
Tel: (+81)-11-706-7246
Note:
If your application is submitted by postal mail, be sure to use registered mail and write “Graduate School Admission Application” in red on the front of the envelope.

7. Examination Fee
¥30,000
(a) Not required of individuals expecting to complete a master’s degree program or a professional degree program in any of graduate schools of Hokkaido University.
(b) Japanese government (MEXT) scholarship students, China Scholarship Council (CSC) supported students, Hokkaido University President’s Fellowship recipients, and Hokkaido University Special Grant Program international students (as well as those who are expecting to receive one of these scholarships) may be exempt from paying the examination fee. If there is a possibility that you will be eligible for an exemption, please contact the CSE office in advance.
(c) Applicants should pay the examination fee at a bank or other financial institution (including Japan Post Bank) in Japan using the enclosed prescribed payment slip and attach the validated portion (portion E) of the payment slip to the submission form. Applicants residing outside Japan and admitted to apply via Internet should follow the on-screen instructions to arrange for payment of examination fee and the administrative fee (¥500).
(d) In principle, entrance examination fees are not refundable. Only the following cases are refundable:
• If an individual paid the examination fee but did not apply for admission (did not submit an application or submitted an application that was not accepted)
• If the examination fee was accidentally paid twice
• If an individual, who is not required to pay the examination fee has made payment.

8. Submission of English Scores
Submit your English score reporting form (prescribed form) at the time of application. Also, submit your English score sheets as follows.

Scores to Be Submitted
Either of the English-language proficiency examination score sheets listed in (a) or (b) below, from examinations taken in or after April 2017.
(a) TOEFL test official score sheet
Submit the Examinee Score Report sent to the examinee by the U.S. Educational Testing Service (ETS). A printout of test results posted online shall be considered invalid.
It takes about seven to eight weeks to receive scores after taking the examination, so be sure to take the examination early enough to get your scores in time.
On the Score Report Preferences screen shown during the process of applying to take the TOEFL iBT test, be sure to select “Web-accessible Score Report and a printed copy mailed to you” to ensure that a Examinee Score Report is mailed to you.
(b) TOEIC L&R test score sheet
Submit the Official Score Certificate. A printout of test results posted online shall be considered invalid.
It takes about one month to receive scores after taking the examination, so be sure to take the examination early enough to get your scores in time.

Please note that scores from examinations such as the TOEFL-ITP test score sheet, TOEFL IP test and TOEIC Bridge test shall be considered invalid.

Important Notes
(a) Even if you are unable to submit an English examination score sheet, your graduate school examination fee will not be refunded.
(b) If you submit more than one score sheet, the best score submitted shall be used. Individuals who have already submitted scores at the time of application may submit new scores on during the period on February 12 (Wed.) to February 18 (Tue.), 2020.
(c) English score sheets will be returned after the exam date.

9. Selection Method
Admission decisions will be made based on a comprehensive review (oral examination, etc.) of the applicant’s master’s thesis or equivalent paper and the applicant’s knowledge of the subject matter and foreign-language skills.

For working adult applicants, the review of the applicant’s knowledge of the subject matter and foreign-language skills will be replaced with a review (oral examination, etc.) of the results of the applicant’s research conducted as a working adult.
10. Examination Schedule, Etc.

February 28 (Fri.), 2020

Note:
The oral examination schedule, examination venue, and other details will be provided when the examination admission card is sent out.

<table>
<thead>
<tr>
<th>Examination Date</th>
<th>Time</th>
<th>Examination Subject</th>
<th>Examination Venue</th>
</tr>
</thead>
<tbody>
<tr>
<td>Feb.28 (Fri.)</td>
<td>From 9:00 a.m. or from 1:00 p.m.</td>
<td>Oral examination</td>
<td>To be specified when the examination admission card is sent out</td>
</tr>
</tbody>
</table>

11. Announcements of the Result

The examination admission numbers of those who passed the examination will be posted in the entrance hall of the School of Engineering, the first-floor hall of the School of Science Bldg. 2, and the first-floor hall of the School of Engineering’s Materials Engineering and Chemistry Bldg. at 4:30 p.m. (tentatively) on March 11 (Wed.), 2020. In addition, all examinees will be notified of their results individually.

(Information about whether an applicant has passed or failed the examination will not be provided over the phone.)

12. Enrollment Procedures and Expenses

Details regarding enrollment procedures are provided in the notifications mailed to those who have been accepted.

Enrollment fee: ¥282,000

Note:

Not required of students continuing into this doctoral course from a master’s degree program or professional degree program in a graduate school of Hokkaido University.

First semester tuition for academic year 2020: ¥267,900 (total annual amount: ¥535,800)

Notes:
1. If any revision is made while the student is enrolled, the new amount will be applied from the time of the revision.
2. If the enrollment fee is not paid during the admission procedure period, the applicant will be treated as having no intent to enroll.
3. If tuition is not paid for one semester, the student will be expelled, and his/her record of enrollment will be deleted. If you are having problems paying tuition due to financial hardship, you may be eligible for a tuition exemption or deferral.

13. Important Notes

(1) Be sure to bring your examination admission card with you on the day of the entrance examination and place it on your desk.
(2) Incomplete applications may not be accepted. Be sure that there are no errors in your application.
(3) If the name on your certificate of graduation or other documents is different from your current name, for example, your surname has changed, attach a certificate of family registry or other official document that verifies the change.
(4) If any falsified information is found in the application documents, the applicant’s admission may be revoked.
(5) Our graduate school generally does not allow dual enrollment.

14. Long-Term Study Program
The long-term study program is available to students who want to study systematically over a period of time longer than the standard course term (three years for a doctoral course) due to full-time employment or other circumstances that limit the time to attend classes and conduct research. Students must apply for this program and receive the approval from the graduate school. Once approved, the student will pursue a systematic course of study over a specified length of time. Those wishing to take advantage of this system should carefully read and follow the application instructions in the section entitled “Information on the Long-Term Study Program” on page 23. Be sure to consult with your prospective academic advisor in advance regarding this program.

15. Others
(1) Examination admission cards will be sent out in **mid-February 2020** to those whose applications have been accepted.

(2) Applicants who are physically disabled and who may need special accommodations to take examinations and attend classes should notify the CSE office of their condition by January 20 (Mon.), 2020.

(3) If you wish to receive a copy of the application guidelines by mail, send a self-addressed stamped envelope with your request. (The envelope should be large enough to fit an A4-sized booklet and be stamped with ¥250 worth of postage stamps or ¥540 if you prefer express delivery.) Address the outer envelope to the Graduate School of Chemical Sciences and Engineering Administration Office and write “Request for Ph.D Program Application Guidelines” in red on the front. Also, enclose a note indicating the telephone number where you can be reached.

If you have any questions regarding the application process, contact the office below.

Administration Office, Graduate School of Chemical Sciences and Engineering, Hokkaido University (CSE Office)
Kita 13, Nishi 8, Kita-ku, Sapporo, 060-8628 Japan

2. Application Qualifications

Individuals who are recognized as possessing the skills and capabilities required based on a recommendation from a specialized professor (hereinafter referred to as “the prospective supervisor”) in this graduate school whom the applicant would like to have as his/her research advisor after enrollment and individuals who fulfill one of the following application qualifications:

(1) Individuals who have been awarded or are expected to be awarded a degree equivalent to a master’s degree or professional degree from a foreign university by March 2020.

(2) Individuals who have been awarded or are expected to be awarded a degree equivalent to a master’s degree or professional degree by March 2020 by taking a correspondence course in Japan offered by a foreign school.

(3) Individuals who have completed a graduate school coursework of a foreign university at an educational institution in Japan and have been awarded a degree equivalent to a master’s degree or professional degree. The institution needs to be positioned within the school education system of that foreign country as an educational body with a graduate school course and is required to be designated by the Japanese minister of education, culture, sports, science, and technology. This includes those who are expected to be awarded such a degree by March 2020.

(4) Individuals who have been awarded or are expected to be awarded a degree equivalent to a master’s degree by March 2020 from the United Nations University as prescribed in Article 1(2) of the Act on Special Measures Incidental of Enforcement of the Agreement between the United Nations and Japan regarding the Headquarters of the United Nations University (Act No.72 of 1976), which was established under the December 11, 1972 resolution of the General Assembly of the United Nations.

(5) Individuals who have completed their formal education by taking a correspondence course through a non-Japanese university, an educational institution which received the designation by (3), or the United Nations University, who have passed an examination or a screening equivalent to the regulations by Article 16.2 in Standards for the Establishment of Graduate Schools, and who are recognized to have an academic ability equivalent to Master’s degree holders by the Graduate School, or who will obtain it by March 2020.

(6) Individuals designated by the Minister of Education, Culture, Sports, Science, and Technology (1989 Notice No. 118, Ministry of Education, Science and Culture), i.e., individuals who have completed 16 years of school education in a foreign country or 16 years of school education of a foreign country by taking a correspondence course in Japan offered by a school of that foreign country; have conducted research for two years or longer at a university, research institution, etc.; and are recognized by this graduate school as possessing equivalent or greater academic capabilities as those of a person who has a master’s degree based on its research findings, etc.

(7) Applicants who are recognized by the graduate school as possessing the equivalent or greater academic skill as that of a person who has a master’s degree or professional degree based on an individualized admission qualification investigation and who will be 24 years of age as of March 31, 2020.
Notes:

1. Applicants must contact their prospective supervisor in advance.
2. If you have any questions regarding the Application Qualifications, contact the Administration Office of the Graduate School of Chemical Sciences and Engineering (hereafter referred to as “CSE office”).

3. Preliminary Review of Application Qualifications (Application Period, Etc.)
   October 25 (Fri.) through October 31 (Thu.), 2019
   We will conduct a preliminary review of application qualifications before accepting applications from individuals applying based on the above-mentioned application qualification (6) or (7). The applicants should submit the documents indicated in section 5, “Application Documents,” with the exception of item No. 2 (submission form for the validated portion of the prescribed payment slip), during this period.

   The applicant should not pay the examination fee when requesting a preliminary review of application qualifications. The examination fee is to be paid as per instructions in the notes below. (Documents can be submitted from 9:00 a.m. to 5:00 p.m., on weekdays only. If you send your documents by postal mail, they must be received by the deadline indicated.)

Notes:

   The results of the preliminary review of application qualifications will be mailed out around Early November, 2019. Those who are deemed eligible to apply should pay the examination fee as per section 7, “Examination Fee,” during the period indicated in section 4, “Application Period.” After payment is made, please submit the validated portion (portion E) of the prescribed payment slip to the university. If you do not pay the examination fee by the deadline indicated, your application will not be processed.

   Applicants residing outside Japan who are allowed to submit their applications via the Internet should follow the on-screen instructions to arrange payment of the examination fee and the administrative fee (¥500).

   Note that Japanese government (MEXT) scholarship students, China Scholarship Council (CSC) supported students, Hokkaido University President’s Fellowship recipients, and Hokkaido University Special Grant Program international students (as well as those who are expecting to receive one of these scholarships) may be exempt from paying the examination fee. If there is a possibility that you will be eligible for an exemption, please contact the CSE office in advance.

4. Application Period
   November 11 (Mon.) through November 15 (Fri.), 2019
   If you send your application by mail, it must be received during this application period. (Documents can be submitted between 9:00 a.m. and 5:00 p.m. on weekdays only.)

6. Where to Apply
Administration Office, Graduate School of Chemical Sciences and Engineering, Hokkaido University (CSE Office)
Kita 13, Nishi 8, Kita-ku, Sapporo, 060-8628 Japan
Tel: (+81)-11-706-7246
Note:
If your application is submitted by postal mail, be sure to use registered mail and write “Graduate School Admission Application” in red on the front of the envelope.

7. Examination Fee
¥30,000
(a) Japanese government (MEXT) scholarship students, China Scholarship Council (CSC) supported students, Hokkaido University President’s Fellowship recipients, and Hokkaido University Special Grant Program international students (as well as those who are expecting to receive one of these scholarships) may be exempt from paying the examination fee. If there is a possibility that you will be eligible for an exemption, please contact the CSE office in advance.
(b) Applicants should pay the examination fee at a bank or other financial institution (including Japan Post Bank) in Japan using the enclosed prescribed payment slip and attach the validated portion (portion E) of the payment slip to the submission form. Applicants residing outside Japan and admitted to apply via Internet should follow the on-screen instructions to arrange for payment of examination fee and the administrative fee (¥500).
(c) In principle, entrance examination fees are not refundable. Only the following cases are refundable:
• If an individual paid the examination fee but did not apply for admission (did not submit an application or submitted an application that was not accepted)
• If the examination fee was accidentally paid twice
• If an individual, who is not required to pay the examination fee has made payment.
Note:
For more detailed information on the methods of paying the examination fee, contact your accepting professor.

8. Submission of English Scores
Submit your English score reporting form (prescribed form) at the time of application. Also, submit your English score sheets as follows.

Scores to Be Submitted
Either of the English-language proficiency examination score sheets listed in (a) or (b) below, from examinations taken in or after April 2017.
(a) TOEFL test official score sheet
Submit the Examinee Score Report sent to the examinee by the U.S. Educational Testing Service (ETS). A printout of test results posted online shall be considered invalid.
It takes about seven to eight weeks to receive scores after taking the examination, so be sure to take the examination early enough to get your scores in time.
On the Score Report Preferences screen shown during the process of applying to take the TOEFL iBT test, be sure to select “Web-accessible Score Report and a printed copy mailed to you” to ensure that a Examinee Score Report is mailed to you.
(b) TOEIC L&R test score sheet
Submit the Official Score Certificate. A printout of test results posted online shall be considered invalid.

It takes about one month to receive scores after taking the examination, so be sure to take the examination early enough to get your scores in time.

Please note that scores from examinations such as the TOEFL-ITP test score sheet, TOEFL IP test and TOEIC Bridge test shall be considered invalid.

Important Notes
(a) Even if you are unable to submit an English examination score sheet, your graduate school examination fee will not be refunded.
(c) If you submit more than one score sheet, the best score submitted shall be used. Individuals who have already submitted scores at the time of application may submit new scores on during the period on November 25 (Mon.) to November 29 (Fri.), 2019.
(d) English score sheet will be returned after the exam date.

9. Selection Method
Admission decisions will be made based on a comprehensive review (oral examination, etc.) of the applicant’s master’s thesis or equivalent paper and the applicant’s knowledge of the subject matter and foreign-language skills.

If you apply for a special program approved by the Graduate School of Chemical Sciences and Engineering, you may be exempt from taking the entrance examination, and thus may only be subject to the document review.

10. Examination Schedule, Etc.
December 13 (Fri.), 2019
Examination subjects are based on the general admission.

11. Announcements of the Result
The examination admission numbers of those who passed the examination will be posted in the entrance hall of the School of Engineering, the first-floor hall of the School of Science Bldg. 2, and the first-floor hall of the School of Engineering’s Materials Engineering and Chemistry Bldg. at 4:30 p.m. (tentatively) on January 29 (Wed.), 2020. In addition, all examinees will be notified of their results individually.
(Information about whether an applicant has passed or failed the examination will not be provided over the phone.)

12. Enrollment Procedures and Expenses
Details regarding enrollment procedures are provided in the notifications mailed to those who have been accepted.
Enrollment fee: ¥282,000
First semester tuition for academic year 2020: ¥267,900 (total annual amount: ¥535,800)
Notes:
1. If any revision is made while the student is enrolled, the new amount will be applied from the time of the revision.
2. If the enrollment fee is not paid during the admission procedure period, the applicant will be treated as having no intent to enroll.
3. If tuition is not paid for one semester, the student will be expelled, and his/her record of enrollment will be deleted. If you are having problems paying tuition due to financial hardship,
you may be eligible for a tuition exemption or deferral.

13. Important Notes
(1) Be sure to bring your examination admission card with you on the day of the entrance examination and place it on your desk.
(2) Incomplete applications may not be accepted. Be sure that there are no errors in your application.
(3) If any falsified information is found in the application documents, the applicant’s admission may be revoked.
(4) Our graduate school generally does not allow dual enrollment.

14. Long-Term Study Program
Our graduate school has a long-term study program. Those wishing to take advantage of this system should carefully read and follow the application instructions in the section entitled “Information on the Long-Term Study Program” on page 23.

15. Others
(1) Examination admission cards will be sent out in Late November 2019 to those whose applications have been accepted (with the exception of those who are applying for a special program approved by this graduate school).
(2) Applicants who are physically disabled and who may need special accommodations to take examinations and attend classes should notify the CSE office of their condition by November 15 (Fri.), 2019.
II-2. International Student Admission (Residents in Japan)

2. Application Qualifications

Individuals who are recognized as possessing the skills and capabilities required based on a recommendation from a specialized professor (hereinafter referred to as “the prospective supervisor”) in this graduate school whom the applicant would like to have as his/her research advisor after enrollment and individuals who fulfill one of the following application qualifications:

1. Individuals who have been awarded or are expected to be awarded a degree equivalent to a master’s degree or professional degree from a foreign university by March 2020.

2. Individuals who have been awarded or are expected to be awarded a degree equivalent to a master’s degree or professional degree by March 2020 by taking a correspondence course in Japan offered by a foreign school.

3. Individuals who have completed a graduate school coursework of a foreign university at an educational institution in Japan and have been awarded a degree equivalent to a master’s degree or professional degree. The institution needs to be positioned within the school education system of that foreign country as an educational body with a graduate school course and is required to be designated by the Japanese minister of education, culture, sports, science, and technology. This includes those who are expected to be awarded such a degree by March 2020.

4. Individuals who have been awarded or are expected to be awarded a degree equivalent to a master’s degree by March 2020 from the United Nations University as prescribed in Article 1(2) of the Act on Special Measures Incidental of Enforcement of the Agreement between the United Nations and Japan regarding the Headquarters of the United Nations University (Act No.72 of 1976), which was established under the December 11, 1972 resolution of the General Assembly of the United Nations.

5. Individuals who have completed their formal education by taking a correspondence course through a non-Japanese university, an educational institution which received the designation by (3), or the United Nations University, who have passed an examination or a screening equivalent to the regulations by Article 16.2 in Standards for the Establishment of Graduate Schools, and who are recognized to have an academic ability equivalent to Master’s degree holders by the Graduate School, or who will obtain it by March 2020.

6. Individuals designated by the Minister of Education, Culture, Sports, Science, and Technology (1989 Notice No. 118, Ministry of Education, Science and Culture), i.e., individuals who have completed 16 years of school education in a foreign country or 16 years of school education of a foreign country by taking a correspondence course in Japan offered by a school of that foreign country; have conducted research for two years or longer at a university, research institution, etc.; and are recognized by this graduate school as possessing equivalent or greater academic capabilities as those of a person who has a master’s degree based on its research findings, etc.

7. Applicants who are recognized by the graduate school as possessing the equivalent or greater academic skill as that of a person who has a master’s degree or professional degree based on an individualized admission qualification investigation and who will be 24 years of age as of March 31, 2020.
Notes:
1. Applicants must contact their prospective supervisor in advance.
2. If you have any questions regarding the Application Qualifications, contact the Administration Office of the Graduate School of Chemical Sciences and Engineering (hereafter referred to as “CSE office”).

3. Preliminary Review of Application Qualifications (Application Period, Etc.)
   December 9 (Mon.) through December 12 (Thu.), 2019
   We will conduct a preliminary review of application qualifications before accepting applications from individuals applying based on the above-mentioned application qualification (6) or (7). The applicants should submit the documents indicated in section 5, “Application Documents,” with the exception of item No. 2 (submission form for the validated portion of the prescribed payment slip), during this period.

   The applicant should not pay the examination fee when requesting a preliminary review of application qualifications. The examination fee is to be paid as per instructions in the notes below. (Documents can be submitted from 9:00 a.m. to 5:00 p.m., on weekdays only. If you send your documents by postal mail, they must be received by the deadline indicated.)

Notes:
   The results of the preliminary review of application qualifications will be mailed out around Early January, 2020. Those who are deemed eligible to apply should pay the examination fee as per section 7, “Examination Fee,” during the period indicated in section 4, “Application Period.” After payment is made, please submit the validated portion (portion E) of the prescribed payment slip to the university. If you do not pay the examination fee by the deadline indicated, your application will not be processed.

   Applicants residing outside Japan who are allowed to submit their applications via the Internet should follow the on-screen instructions to arrange payment of the examination fee and the administrative fee(¥500).

   Note that Japanese government (MEXT) scholarship students, China Scholarship Council (CSC) supported students, Hokkaido University President’s Fellowship recipients, and Hokkaido University Special Grant Program international students (as well as those who are expecting to receive one of these scholarships) may be exempt from paying the examination fee. If there is a possibility that you will be eligible for an exemption, please contact the CSE office in advance.

4. Application Period
   January 14 (Tue.) through January 20 (Mon.), 2020
   If you send your application by mail, it must be received during this application period. (Documents can be submitted between 9:00 a.m. and 5:00 p.m. on weekdays only.)

| 13  | Other required documents from the accepting professor                                     |                                                                                                                                                                                                       |
6. Where to Apply
Administration Office, Graduate School of Chemical Sciences and Engineering, Hokkaido University (CSE Office)
Kita 13, Nishi 8, Kita-ku, Sapporo, 060-8628 Japan
Tel: (+81)-11-706-7246
Note:
If your application is submitted by postal mail, be sure to use registered mail and write “Graduate School Admission Application” in red on the front of the envelope.

7. Examination Fee
¥30,000
(a) Japanese government (MEXT) scholarship students, China Scholarship Council (CSC) supported students, Hokkaido University President’s Fellowship recipients, and Hokkaido University Special Grant Program international students (as well as those who are expecting to receive one of these scholarships) may be exempt from paying the examination fee. If there is a possibility that you will be eligible for an exemption, please contact the CSE office in advance.
(b) Applicants should pay the examination fee at a bank or other financial institution (including Japan Post Bank) in Japan using the enclosed prescribed payment slip and attach the validated portion (portion E) of the payment slip to the submission form. Applicants residing outside Japan and admitted to apply via Internet should follow the on-screen instructions to arrange for payment of examination fee and the administrative fee (¥500).
(c) In principle, entrance examination fees are not refundable. Only the following cases are refundable:
   • If an individual paid the examination fee but did not apply for admission (did not submit an application or submitted an application that was not accepted)
   • If the examination fee was accidentally paid twice
   • If an individual, who is not required to pay the examination fee has made payment.
Note:
For more detailed information on the methods of paying the examination fee, contact your accepting professor.

8. Submission of English Scores
Submit your English score reporting form (prescribed form) at the time of application. Also, submit your English score sheets as follows.

Scores to Be Submitted
Either of the English-language proficiency examination score sheets listed in (a) or (b) below, from examinations taken in or after April 2017.
(a) TOEFL test official score sheet
   Submit the Examinee Score Report sent to the examinee by the U.S. Educational Testing Service (ETS). A printout of test results posted online shall be considered invalid.
   It takes about seven to eight weeks to receive scores after taking the examination, so be sure to take the examination early enough to get your scores in time.
   On the Score Report Preferences screen shown during the process of applying to take the TOEFL iBT test, be sure to select “Web-accessible Score Report and a printed copy mailed to you” to ensure that a Examinee Score Report is mailed to you.
(b) TOEIC L&R test score sheet
Submit the Official Score Certificate. A printout of test results posted online shall be considered invalid.

It takes about one month to receive scores after taking the examination, so be sure to take the examination early enough to get your scores in time.

Please note that scores from examinations such as the TOEFL-ITP test score sheet, TOEFL IP test and TOEIC Bridge test shall be considered invalid.

Important Notes
(a) Even if you are unable to submit an English examination score sheet, your graduate school examination fee will not be refunded.
(b) If you submit more than one score sheet, the best score submitted shall be used. Individuals who have already submitted scores at the time of application may submit new scores on during the period on February 12 (Wed.) to February 18 (Tue.), 2020.
(c) English score sheet will be returned after the exam date.

9. Selection Method
Admission decisions will be made based on a comprehensive review (oral examination, etc.) of the applicant’s master’s thesis or equivalent paper and the applicant’s knowledge of the subject matter and foreign-language skills.

If you apply for a special program approved by the Graduate School of Chemical Sciences and Engineering, you may be exempt from taking the entrance examination, and thus may only be subject to the document review.

10. Examination Schedule, Etc.
February 28 (Fri.), 2020
Examination subjects are based on the general admission.

11. Announcements of the Result
The examination admission numbers of those who passed the examination will be posted in the entrance hall of the School of Engineering, the first-floor hall of the School of Science Bldg. 2, and the first-floor hall of the School of Engineering’s Materials Engineering and Chemistry Bldg. at 4:30 p.m. (tentatively) on March 11 (Wed.), 2020. In addition, all examinees will be notified of their results individually.

(Information about whether an applicant has passed or failed the examination will not be provided over the phone.)

12. Enrollment Procedures and Expenses
Details regarding enrollment procedures are provided in the notifications mailed to those who have been accepted.
Enrollment fee: ¥282,000
First semester tuition for academic year 2020: ¥267,900 (total annual amount: ¥535,800)
Notes:
1. If any revision is made while the student is enrolled, the new amount will be applied from the time of the revision.
2. If the enrollment fee is not paid during the admission procedure period, the applicant will be treated as having no intent to enroll.
3. If tuition is not paid for one semester, the student will be expelled, and his/her record of enrollment will be deleted. If you are having problems paying tuition due to financial hardship,
you may be eligible for a tuition exemption or deferral.

13. Important Notes
(1) Be sure to bring your examination admission card with you on the day of the entrance examination and place it on your desk.
(2) Incomplete applications may not be accepted. Be sure that there are no errors in your application.
(3) If any falsified information is found in the application documents, the applicant’s admission may be revoked.
(4) Our graduate school generally does not allow dual enrollment.

14. Long-Term Study Program
Our graduate school has a long-term study program. Those wishing to take advantage of this system should carefully read and follow the application instructions in the section entitled “Information on the Long-Term Study Program” on page 23.

15. Others
(1) Examination admission cards will be sent out in mid-February 2020 to those whose applications have been accepted (with the exception of those who are applying for a special program approved by this graduate school).
(2) Applicants who are physically disabled and who may need special accommodations to take examinations and attend classes should notify the CSE office of their condition by January 20 (Mon.), 2020.

If you have any questions regarding the application process, contact the office below.
Administration Office, Graduate School of Chemical Sciences and Engineering, Hokkaido University (CSE Office)
Kita 13, Nishi 8, Kita-ku, Sapporo, 060-8628 Japan
Tel: (+81)-11-706-7246
Information on the Long-Term Study Program

1. Overview
This program is available to students who would not be able to complete the program within the standard course term (three years) due to full-time employment or other circumstances (including responsibilities related to the care of elderly or disabled family members or the raising of children) and therefore want a longer period of time to conduct their studies systematically. Students must file an application and may be approved for a systematically planned course of study (hereinafter referred to as “long-term study”) after an individual review.

2. Eligibility
Individuals who are applying for the long-term study program must meet one of the terms listed below, be unable to make a commitment to full-time studies as a consequence of the circumstances described, and would therefore like to extend in advance the number of years over which they will conduct their studies (research).
(1) Individuals who are engaged in full-time employment, such as those currently employed by government agencies or companies (excluding those who will continue to receive salaries while being relieved of their work duties), and self-employed individuals
(2) Individuals who are engaged in temporary or part-time employment that is deemed by this graduate school to adversely affect their studies
(3) Individuals who have responsibilities, such as raising children or caring for other family members, that are deemed by this graduate school to adversely affect their studies to the same degree as the responsibilities listed in item (2) above

3. Enrollment Period
The allowable length of period under the long-term study program is up to six years for the doctoral course. Study periods for long-term study applicants are approved in one-year increments.

The maximum length of enrollment (including the period for time off, etc.) for a student who has been approved for long-term study is up to six years in the doctoral course, the same maximum length of time as students under the standard term of study.

The period of time off that this graduate school will allow is the same for students under either the standard term of study or long-term study program, i.e., three years for doctoral students.

4. Application Procedures
(1) Application Deadline
In general, those wishing to apply for the long-term study program should apply at the time they submit their admission applications.
(2) Submission of Documents
Submit the following documents to CSE office:
   (a) An Application for long-term study (form 1)
   (b) A Long-term study plan (form 2)
   (c) Documents verifying your reasons for needing long-term study approval
(3) Review and Notification of Results
Applications for the long-term study program will be reviewed by the graduate school, and applicants will be notified of the results of that review.
(Notification of results: mid-March [tentatively])
5. Contraction or Extension of the Long-Term Study Period
   If deemed necessary by the graduate school, approval may be granted for a contraction or extension of the long-term study period once, and only once, during the student’s period of enrollment. However, the long-term study period can only be contracted from six years to four years (one year beyond the standard three-year course term) or five years to four years.

6. Tuition Fee
   The tuition of students who have been approved for the long-term study program shall be calculated in annual amounts by dividing the total tuition for the standard term of study (annual tuition × 3 years) by the number of years for which the long-term study has been approved. In cases where the tuition amount is revised or a change to the long-term study period is approved, tuition will be recalculated at that time. However, any tuition already paid will not be adjusted retroactively.
   ※Be sure not to pay the tuition for your current term of study until you are notified of whether your application for the long-term study program or a change thereof has been approved.

7. Other
   To request an application form or clarify any issues, contact CSE office.
Handling of Personal Information

(1) All personal information collected by Hokkaido University will be completely protected in compliance with the Act on the Protection of Personal Information Held by Independent Administrative Agencies, etc., and other related acts and pursuant to the Hokkaido University Personal Information Management Regulations.

(2) Names, addresses, and other personal information provided to the university through application procedures will be used solely for (a) enrollee selection, (b) the announcement of exam results, (c) admission procedures, (d) surveys and research on enrollee selection methods, and (e) related processes.

(3) Some of these processes may be outsourced by the university to a contracted service provider (hereinafter referred to as “contractor”). All or some of the personal information provided by applicants may be provided to the contractor only as needed to perform the tasks for which it has been contracted.

(4) Personal information obtained through application procedures will be used only for those who are admitted for (a) school administration purposes (student registration, academic counseling, etc.), (b) student support services (health management, scholarship applications, etc.), and (c) tuition and other administrative purposes.

(5) Of the personal information described in item (4) above, only names and addresses will be used to facilitate communication with students from the Hokkaido University Frontier Foundation and organizations related to Hokkaido University, such as (a) the Hokkaido University Athletic Union, and (b) the Hokkaido University School of Engineering and School of Science Alumni Association.

Inorganic solid state chemistry. Studies on magnetic and electronic properties of inorganic materials including rare-earth and 4d, 5d transition elements. Design of crystal/atomic structure, evaluation of magnetic and electronic properties, and development of new ferromagnets and superconductors.

Preparation of emerging functional ceramics, microstructure control of ceramics and their property evaluation, new synchrotrons for optical, electromagnetic and chemical application. Growth of oxide single crystals for optical devices.

Synthesis and new functions of nano-structured solids and thin films including inorganic nanomaterials, organic semiconductors, spintronics devices and nanocarbons.

Fabrication and characterization of new optical and electrical functional materials and magnetic devices with nanostructures to realize a strong coupling with photon or electron.

Design of nano/microstructures and control of functional properties of new functional ceramics based on processing science of fine particles and powders.

Preparation of ceramics nanoparticles and their applications for bioanalysis and biosensing.

Preparation of ceramics nanoparticles and their applications for bioanalysis and biosensing.

Designing high performance and long life materials using surface finishing, electrochemistry and structural control techniques, physical chemistry of organic electronic materials and their application to electronic devices and computational chemistry.

Fabrication of functional oxide nanofilms, nanoporous films and functional surfaces using electrochemical processes, tailoring of novel materials for batteries and fuel cells for next generation.

Development of strong-luminescent and opto-magnetic nano-materials based on photochemistry, advanced electrochemical analyses using novel micro electrodes.

Discovery of new physical phenomena and development of new functional materials thought fabrication of complex systems beyond their hierarchy from nanometer to millimeter by controlling intermolecular interactions among chemical and biological components.

Fundamental study of chemical-electric energy conversion including novel batteries, and fuel cell catalyst, and genetically-engineered microbial electrode catalysts. In situ determination of geometric, electronic and molecular structures at solid/liquid interfaces and electron transfer dynamics by ultra-fast laser spectroscopy.

Emphasis materials synthesis, advanced characterizations, and studies of materials properties, all aimed at developing materials that have potential for applications. We focus on strongly correlated electrons, multi-ferroic properties, half-metal properties, and the like.

Research and development of nano-structured semiconductor materials with novel functionalities (photocatalyst, light emitters, etc), and their applications in the fields of environment preservation, new energy production, information technology, biomedical applications.

Development of energy and environmental materials exhibiting electron, ion, and mass transport and stimulus-responsive properties using supramolecular and polymer chemistry and electrochemistry, and their device applications including fuel cells and transistors. Design and synthesis of sophisticated molecules and electrode catalysts, control of nanoscale assembly, and advanced characterization using synchrotron radiation.
